BEACH-SOS

The BEACH-SOS project helps municipalities, coastal tourism businesses and local communities to adapt to climate change in order to ensure thriving and sustainable coastal tourism in the Baltic region.

BEACH-SOS will develop capacity at the municipal level to integrate climate change information into beach management strategies and provide the best available data and information for adaptation of the coastal tourism sector in the Baltic Sea.

This #MadeWithInterreg project helps drive the transition to a green and resilient Baltic Sea region.

Organisations from the following countries cooperate together to make that happen:

Denmark, Germany, Latvia, Poland and United Kingdom
